MEMORANDUM FOR: Director of Central Intelligence
VIA: Deputy Director for Administration
FROM: Robert W. Gambino
Director of Security
SUBJECT: Unannounced Industrial Facility Security Audits (C)
REFERENCE: Memo to D/Sec from DCI, dated 23 Aug 78,
subject: Surprise Inspections at Contractor Facilities

1. (U/AIUO) Action Requested: None; for information only.

2. (C) Background: In response to your request, the attached provides a summary of information regarding our unannounced industrial facility security audits conducted at industrial facilities by the Industrial Security Branch, Office of Security, since 1 September 1977.

(C) Generally, we have found security protection of Agency materials at these facilities to be good. The majority of recommendations concerned procedural changes as opposed to physical security modifications.

(C) Senior management and security staffs at the facilities were most cooperative, and they evidenced a genuine interest in improving their security. In many cases, the requisite security modifications were effected while the audit was still in progress. Our recommendations generally have been well received by the contractors who have responded quickly with respect to implementation of the recommendations.

(C) To keep you current on the industrial security audit program, I will forward to you a brief commentary relative to audits of Agency contractor facilities as they are completed. I have also asked [REDACTED] to inform me of any trips you might be taking which would include visits to our contractors or meetings where our contractors would be present. We will review our files and give you a very brief resume of any significant security material.
